On the Release of the *DTS Group Report 2022*

We are pleased to announce that today we have released the Japanese version of the *DTS Group Report 2022*.

This report introduces Vision2030, our long-term vision, as well as a medium-term management plan as we celebrate the 50th anniversary of our founding. We go on to explain the Group's value creation process and business model (new segments and business in focus) from a medium- to long-term perspective with the aim of realizing our vision of becoming a company that continuously takes on challenges in order to provide value that exceeds expectations.

DTS supports the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and has included the results of scenario analyses conducted in line with the recommendations in this report. We worked to enhance our explanations of progress made in ESG management, such as promoting health management initiatives and strengthening governance.

We hope this report helps all our various stakeholders to better understand the Group.

■ You can view the Japanese version of report at the link below to our website.
